• The registration for prelims are Online as well as On-Spot.
• A problem statement will be given to the teams participating in the event.

• In the given you will have to make the design based on the problem statement and prepare a short presentation to explain your design.
• No extra time will be given to the teams who are late.
• Four teams will be selected from prelims for the finals.
• In any case decision of organizers will be final.
• The finalists would be informed on Exodia Official Website and through email or phone.

Rules for Finals:
• Four teams from prelims and one wildcard entry from online round will comprise the finalists.
• A problem statement and a manual would be provided to the finalists at the venue.

• In the given you will have to make the design based on the problem statement and prepare a short presentation to explain your design.

• You have to give your presentation on the projector. Questions related to the design would be asked by the judges.
• Winners will be announced an hour after the competition.
• Prizes will be given to the winner and runner up.

JUDGING:
A panel of judges will evaluate your design on the basis of:

1. Creativity: How the device breaks new ground by the design. How your design is in relevant to the user using your device.

2. Quality: The effective use of the chosen concept combined with the skill involved in production of the design.

3. Originality and Innovative: The degree to which the design is fresh and something we've never seen before!

The challenge is make design keeping in mind its form and function, aesthetics and ergonomics with no compromise on its user friendliness.
